

Recipient's name

With your support, our objective is to continue on this mission until no woman in Dhaka's slums needs to rely on firewood cooking

Amount donated

\$40

Number of women and families assisted

The change from firewood to gas cooking can:

Protect peoples' health. Smoke inhalation and radiated heat are major contributors to poor health as well as causing frequent accidents and injuries

Improve educational outcomes by freeing time for school work and income generation

Eliminate smelling of wood smoke, a stigma associated with poverty

Fuel for Change: Dhaka

The gift of a gas stove helps women and their families living in slums in Bangladesh improve their lives by eliminating firewood cooking
